

## Year 9 Bite Autumn Term

### Adobe Premier Pro

Is a video editing software that is used to compile videos & audio

#### Transitions

Video transitions are brief effects that smoothly connect different video clips or scenes.

#### Titles

The adding of text to layers that you can change effects to use as titles to trailers etc.

#### Timeline

The timeline is the central panel where you assemble, edit, and arrange your video and audio clips to create a sequence.

#### Export

The process of converting an edited video project into a format that can be viewed on various devices or platforms.

### The Interface of Premier Pro and what each section does

| Panel          | What it is for?   |
|----------------|---|
| Project Bin    | View what clips are in the Project Bin. <b>A</b>  |
| Timeline       | View the edited clips in real time. <b>B</b>  |
| Source Monitor | Displays audio and audio time units. <b>C</b>   |
| Preview/Tools  | See what your clip(s) look like before you add / publish them to the timeline. <b>D</b> |
